## **2. Progress**

The Centre for Urban Studies (CUS) is one of the 20 designated Research Priority Areas at the University of Amsterdam and forms part of the Amsterdam Institute for Social Science Research (AISSR). With more than 50 research staff and over 60 PhD students, it is among the largest academic programs of its kind worldwide, aimed at advancing knowledge of cities and urbanization, informing urban policies and planning. The Centre works closely with academic and non-academic partners. It maintains international networks with other leading institutions through exchanges and research collaborations.

The Centre's research agenda is focused on global challenges of urban sustainable development including questions of economic growth and equity, social inclusion and citizenship, environmental sustainability and urban metabolism, housing, transportation, planning and governance. The Centre is naturally embedded in the Amsterdam urban region but its research programs reach across the world, particularly in North America, the Caribbean, Asia, and Europe.

As indicated in various sections in this report, the Centre has had a strong and productive year and a series of new initiatives, programs, and events are currently underway. Here, it is important to emphasize an increase in productivity, the second year in a row, measured in the number of journal articles; important institutional networking vis-a-vis Amsterdam Metropolitan Solutions, IIT Mumbai, and the UN Global Compact Cities Program; and an increased thematic emphasis on urban sustainable development in social and environmental terms. The added value of the Centre lies especially in the promotion of such cutting-edge interdisciplinary approaches and institutional connections. We elaborate on this in sections below.

### **2.1 Highlights 2014**

- The total affiliated research staff has expanded to 55 tenured/non-tenured research staff and more than 60 PhD students;
- Twelve PhD students promoted in 2014;
- Overall ongoing external research funding in 2014 amounted to 14.1 million.
- The Urban Studies research staff produced 118 refereed journal articles;
- The United Nations Global Compact Cities Program (UN GCCP) has recognized CUS as 'Innovating Research Centre' in view of its strong interdisciplinary approach to questions of urban social sustainability. The UN GCCP aims to advance sustainable urban societies worldwide;
- The Centre played a vital role in the signing of the United Nations Global Compact Cities Program by the municipality of Amsterdam;
- In 2014 the Centre welcomed 13 international visitors, who collaborated on projects with various staff and who gave colloquia in the CUS lecture series;

- The Centre has been involved in two summer course programmes in Urban Studies at graduate and undergraduate level;
- The Centre was instrumental in facilitating official collaboration between the UvA and Amsterdam Metropolitan Solutions in the summer of 2014 and the Centre is involved with AMS on various fronts;
- The Centre facilitated and is funding the creation of a new Urban Cycling Research Institute that began on January 1<sup>st</sup> of 2015;
- The Centre was invited in 2014 by the Ministry of the Interior, as the only Dutch academic institution along with various prominent international consulting agencies, to provide an essay on the challenges to local government in the Netherlands.

## **2.2 Strengthening Cutting-Edge Interdisciplinary Approaches**

We have in the past year emphasized the importance of building bridges from the social sciences (traditionally our domain and main strength) to environmental sciences, engineering, and computational sciences. The joining of Peter Slood and Joyeeta Gupta as research staff of the Centre underscored that trend. Both have given lectures at the Centre and both are actively involving other research staff at the Centre (see the publication lists for examples). Our collaborative symposium with the Centre for Urban Science and Engineering at IIT Mumbai, and our emergent collaboration with AMS also exemplify these trends. Importantly, we have recently started two new searches for postdocs that will be positioned precisely at the nexus of, respectively, urban social geography and big data methodologies, and urban planning and climate change. The Centre is crucial in the organization and funding of these novel interdisciplinary initiatives.

## **2.3 Bridging Research and Education**

The Centre supports curricular programs at the undergraduate and graduate level and facilitates PhD research. The Undergraduate Minor in Urban Studies is open to all students at the University. The Research Master in Urban Studies is a selective 2-year program aiming to prepare students for PhD and research positions.

### Research Master Urban Studies

The research master is taught by the Centre's staff with various opportunities for the students to be engaged with ongoing research at the Centre and students are invited to attend academic activities organized by the Centre.

### Urban Studies Minor

This curricular program was designed and introduced by the Centre and a considerable part of the courses is taught by the Centre's researchers. It was started in the fall of 2012. The Minor consists of 30

ECs and is also available as a ‘domain’ (instead of a minor) to students working towards the BA degree in Interdisciplinary Social Sciences (Algemene Sociale Wetenschappen).

#### Urban Studies Summer Course ‘Planning and Living in Cities’

In this three-week program students explore the fundamental issues that are shaping the development and evolution of cities in the 21st century. The course has been runned and taught by Dr Richard Ronald and colleagues from the Centre for Urban Studies. In addition, local experts have been involved to provide city tours in Amsterdam, The Hague, Rotterdam, Brussels, and Paris.

#### Summer School Thinking City ‘The Dynamics of Making Amsterdam’

This three week lasting summer school is a collaborative initiative by the Centre for Urban Studies, the TU Delft and Stichting Thinking City of VMX Architects and Zef Hemel (Wibaut Chair, CUS/UvA). Various partners from the city have also been involved in the course. It contains an extensive public program, including workshops and classes by diverse experts among which the CUS research staff. The course has been open to all talented Master and PhD students and professionals whose studies and work relate to the planning and development of cities—ranging from the fields of art, architecture, urbanism and planning, to economical, social, cultural and political sciences.

## **2.4 Challenges**

We think it is important to expand the scope of our activities beyond social sciences per se and connect with environmental sciences, humanities, computational sciences, and engineering. There are important opportunities here as the problematics of cities increasingly are defined at the crossroads of these fields. The UvA and Urban Studies at UvA is traditionally concentrated in the social sciences and with considerable success. This implies that there can also be risks in broadening the focus of our research – we must try to expand and connect beyond the social sciences while continuing and maintaining our strenghts. The importance of this challenge, and of this opportunity, can hardly be overstated.

Another challenge for the Centre is to engage with the public domain, maintain relations with public entities especially in the Amsterdam region and be involved in relevant curricula at UvA while maintaining optimal focus on academic research. This challenge is inherent to the field of urban studies, a field that naturally involves citizens, organizations, NGOs, government agencies, and so forth, which warrant *and* necessitates engagement of the Centre outside the academy strictly defined. We are also naturally and productively involved in urban studies curricula (esp. the ResMa and the Undergraduate Minor) and here, too, we must strike a balance. The point here is that the Centre is more than a Research Priority Area – it is for that very reason that we established the Centre in 2011. But research remains our core business.

## **4. Other Results**

- The Centre for Urban Studies was instrumental in the facilitation of a formal agreement of the UvA with Amsterdam Metropolitan Solutions (the organization that was initiated and funded by the City of Amsterdam at €50 million and that is currently housed in Amsterdam at the KIT).
- The Centre for Urban Studies was invited, as the only academic entity along with various high-profile private consulting firms, to provide an essay for the Ministry of the Interior on the topic of social challenges to Dutch local governments. The essay was submitted in January of 2015 and will be presented in March.
- The Centre for Urban Studies was instrumental in the City of Amsterdam becoming a signatory to the UN Global Compact Cities Program and is currently engaged in trilateral talks to pursue collaborative agendas on urban sustainable development.
- The Centre initiated and spearheaded the organization of a symposium on urban sustainable development in collaboration with the Centre for Urban Science and Engineering of IIT Mumbai. The symposium, taking place on March 26-27, involves the City of Amsterdam at various levels (it will be opened by the Mayor of Amsterdam) and representation of the CvB and will also entail a Memorandum of Understanding between UvA and IIT.
- Current major external grant applications are pending with NWO and ERC and additional applications with the ERC are in preparation to be submitted in June of 2015.
- The Centre has facilitated new exchange programs for the Research Master in Urban Studies with the University of Pretoria and IIT Mumbai, allowing a broadening of the ResMa to include cities from the ‘global south.’

### **4.1 Research Exposure**

In 2014, we increased the visibility of urban studies through the promotion of research projects and related events not only among our research staff but also in UvA newsletters, media, on posters, and on the web. We maintain close relations with key persons of the Amsterdam Economic Board (Zef Hemel is on our staff), Planbureau voor de Leefomgeving (Maarten Hajer, David Evers, and Dorien Manting are part time on our staff), Dienst Ruimtelijke Ordening – gemeente Amsterdam, Bureau Monumentenzorg en Archeologie, Bureau Onderzoek & Statistiek Amsterdam, Pakhuis de Zwijger, Stadsherstel, and VU University (esp. Architectural History), to promote our events within their organization and to develop joint initiatives.

The exposure of Urban Studies at the UvA has also increased with our highly maintained website ([www.urbanstudies.uva.nl](http://www.urbanstudies.uva.nl)), including the very frequently visited Urban Studies Blog. In total, the number of visitors to the website amounted 16.147 unique visitors in 2014. Visitors came from all over the world but the main contributing countries to these visitor statistics are the Netherlands (9204), the United States (1158), the United Kingdom (849), Germany (537), and Italy (378), which implies that

almost 50 percent of the visitors originated from abroad. The website, thus, contributes highly to the international character of CUS.

The Centre for Urban Studies focuses on the interdisciplinary study of urban phenomena and urban processes and aims to develop synergies that allow innovative and cutting edge-research ventures and curricula. Through the launch of the CUS Working Paper Series and the organization of international workshops Urban Studies has promoted comparative research as well as contributed to the wide dissemination of research output and expertise in the field. The Centre has also funded selected projects among research staff that are interdisciplinary, dependent on funding (i.e., are not likely to happen without our funding) and that have an identifiable end product. The new Working Paper Series has attracted international attention and is now included in the indices of Google Scholar.

The Centre's growing international visibility is also expressed in the start of a new book series entitled *The Contemporary City* by Palgrave-Macmillan under the auspices of the Centre for Urban Studies and the City University of Hong Kong (see:

<http://urbanstudies.uva.nl/news/news/news/content/folder/2015/01/the-contemporary-city.html>).

## 4.2 Collaborations

### 4.2.1 Collaborations with the Public Sector

Inter alia, but most notably:

- Amsterdam Academische Club (expert meeting series titled 'De Republiek Amsterdam', amongst other high-profile events)
- Academie van de Stad (educational partner in the research master's programme in Urban Studies)
- Centraal Bureau voor de Statistiek (CBS), The Hague, amongst other projects, a meta-data analysis on cycling and cycling behaviour
- Dienst Onderzoek en Statistiek (O+S), Municipality of Amsterdam (various research collaborations)
- Dutch Cycling Embassy (collaborator in the Urban Cycling Institute, an initiative launched by the Centre for Urban Studies)
- Fietsersbond, collaboration to evaluate the effectiveness of cycling policy
- Geestelijke Gezondheids Dienst (GGD) Amsterdam (research project examines the effects of risk communication on risk perception).
- Pakhuis de Zwijger (aimed at a broad audience, the Centre for Urban Studies organizes multiple 'Urban Movies' nights throughout the year with Pakhuis de Zwijger)

- Physical Planning Department (DRO), Municipality of Amsterdam (various research collaborations)
- Planbureau voor de Leefomgeving (PBL)
- United Nations (the Centre for Urban Studies is appointed ‘Innovating Research Centre’ in the UN’s Cities Programme, the world’s largest corporate responsibility initiative which strives to create sustainable societies in which economic, ecological, political and cultural issues are integrated and advanced).

#### 4.2.2 (Inter)national Academic Partners

Inter alia, but most notably:

- Amsterdam Institute for Advanced Metropolitan Solutions (AMS)
- Centre for Policy Research, New Delhi, India, research collaboration on drinking water and sanitation in India
- Delft University of Technology, research collaboration titled ‘Implementing Transit Oriented Development’ led by the Urban Planning (UP) research group
- Exchange partners / educational academic partners for the research master students in Urban Studies: Humboldt Universität, University of Birmingham, University of Bonn, Boston Northeastern University, Slovak University of Technology in Bratislava, Vrije Universiteit Brussel, Aalto University, University of Glasgow, Izmir Institute for Technology Turkey, Hong Kong University, City University Hong Kong, UCL, Bartlett School of Planning, Universidad Politecnica de Madrid, University of Melbourne, Dipartimento Architettura e Pianificazione, Politecnico di Milano, Newcastle University, Fordham University, Institut Français d’Urbanisme Paris, University of Pretoria, University of Washington, Royal Institute of Technology (KTH) Stockholm, Florida State University, UBC School of Community and Regional Planning Vancouver, Bauhaus Universität Weimar
- Free University (VU Amsterdam)
- Norwegian Institute for Urban and Regional Research, research titled ‘Chances2Sustain’ on sustainable urban development
- Uppsala University, research collaboration on neighbourhood effects led by the Urban Geographies (UG) research group
- Wayne State University, research collaboration on neighbourhood effects led by the Urban Geographies (UG) research group
- York University, Canada, collaboration on Global Suburbanism
- Indian Institute of Technology Bombay (IIT Mumbai), collaboration on Sustainable Urban Development and Urbanization in India
- Wageningen UR, Wageningen, The Netherlands, Environmental Sciences, Land Use Planning Group, on regional land policy and planning

- EU-ACP project with UWI (Trinidad); dissemination science and technology for urban management
- University of British Columbia, research project on markets and diversity, a research question that centers on the impacts of cultural diversity on the nature and operation of street markets
- University of Miami, USA, research collaboration on planning law and housing
- University of Ulster, Belfast, on Land Economics, Planning System Reform and Consensus-building.
- University of Utrecht, research collaboration titled ‘Design and assessment of regional spatial and infrastructure visions’ led by the Urban Planning (UP) research group.

## 5. Future

For events planned for 2015, see section above ‘On the Horizon: calendar 2015’. In addition, we are planning new hires and staff expansion and external grants applications. The Centre will continue its expansive focus on the theme of urban sustainable development, broadly defined in social and environmental terms. The Centre will also continue to build bridges towards computational science (big data) and environmental sciences and engineering.

### 5.1 Pending Grant Applications

The current pending grant applications are represented below in Table 2. Furthermore, we will submit at least two other ERC (advanced) on Indian urbanization and environmental issues in June of 2015 (Nijman; Gupta), two EU Horizon 2020 applications (Salet/Savini; Duyvendak), one NWO JPI on Smart Cities (Bertolini, Savini, Pfeffer), one NWO STW on urban cycling (Brommelstroet), and two NWO SURF Verdus in April (Bertolini; Musterd).

## 5.2 Two New Post-Doc Researcher Postions in Urban Studies

We are now in the start-up phase of two new searches for postdocs along a format that has proven very succesful in the past: an appointment for two years with the expectation of significant external acquisition and the possibility of a steady appointment if succesful. The postdocs will have a 70% research appointment, they will work on cutting edge themes and they will be supervised by full professors from different disciplines – all members of the Centre for Urban Studies. The first postdoc is in the area of ‘adaptive cities in relation to global climate change’ and the other is in the area of social urban geography and big data. The first position will be supervised by Joyeeta Gupta and Luca Bertolini, and the second will be supervised by Sako Musterd and Peter Sloot. These new postdocs will start on September 1 of 2015.

Section 6 provides a detailed overview of the budget. The budget shows that the Centre has a financial reserve, fort his reason there is room for two new postdoctoral positions. Table 3 provides an overview of the approximate costs of appointing two post-docs (UD’s) for two years (24 months) on a 0,7fte research appointment.

**Table 3: Personnel Costs Two Post-Doc Postions**

\*\*Full year, 2016 (12 months)

\*\*\*January 1<sup>st</sup> – August 31<sup>st</sup> (8 months)

## 5.3 Strengthening of International Relations

The Centre will expand its relations with top institutions in India, including IIT Mumbai and the Centre for Policy Research in Delhi. The need for urban research and funding opportunities in India (as in China) are growing quickly and there is considerable potential for involvement of the Centre, particularly in the realm of urban sustainability.
