## 2. Progress

The Centre for Urban Studies (CUS) is one of 20 designated Research Priority Areas at the University of Amsterdam and forms part of the Amsterdam Institute for Social Science Research (AISSR). With more than 60 research staff and an equal number of PhD students (incl. contracted and external Ph.D.'s), it is among the largest academic programs of its kind worldwide. The Centre brings together urban scholars in human geography, planning, sociology, political science, international development studies, anthropology, and computational science, facilitating and actively fostering interdisciplinary research and collaborations in urban studies.

In today's increasingly global and interconnected world, over half of humanity lives in urban areas. As the world is projected to keep rapidly urbanizing, many important issues and challenges are now first and foremost linked to the urban context. Research funding agencies worldwide are increasingly recognizing this. A significant part of European research funding is earmarked for projects addressing urban challenges, as with the cross-cutting, €232 million call 'Smart and Sustainable Cities' of the Horizon 2020 work programme for 2016-2017, or the multi-year Joint Programming Initiative 'Urban Europe'. The Dutch national research council NWO recently launched a 'Smart Urban Regions of the Future' call (NWO-SURF) with a budget of €16,5 million. 'Smart, liveable cities' is one of the 16 'Exemplary routes' on which the Dutch national scientific agenda ('Nationale Wetenschapsagenda') will focus in the near future. And all this is not counting other research areas which also have a strong urban focus, as for instance the Horizon 2020 areas 'Transport' or 'Environment & Climate Action'.

The efforts and added value of the research priority area Urban Studies center on the need for interdisciplinary, synergetic collaborations that are essential in order to understand and solve the pressing urban challenges of our time. Our research agenda focusses on global challenges of urban sustainable development, including questions of economic growth and equity, social inclusion and citizenship, migration, environmental sustainability and urban metabolism, housing, mobility, planning and governance. The Centre works closely with academic and non-academic partners, enables international academic collaborations, and facilitates science-practice interactions.

This report documents Urban Studies' 2015 progress, results, outlook, and budget. 2015 was a transition year; as of 01-09-2015 prof. dr. Jan Nijman stepped down as director of the Centre and was succeeded by prof. dr. ir. Luca Bertolini. The change in directorship naturally resulted in modifications in the strategic direction of the Centre. In this report, we will elaborate on this shift at some length.

Through the various sections, it will become clear that 2015 was an especially active, productive, and strong year in terms of publications, awarded grants, new interdisciplinary initiatives, international collaborations, visibility and valorisation. Furthermore, the seeds were planted for many initiatives that are developing and will continue to develop in 2016 and forthcoming years.

## 2.1 Highlights 2015

- For the third year in a row, the Centre increased its productivity, measured in the **number of refereed journal articles: 133, and total publication output per Fte of 5.8** for 2015;
- Total **acquired external research funding** in 2015 amounted to **3.6 million EUR**;
- Overall **ongoing external research funding** in 2015 amounted to **12.3 million EUR**;
- The Centre funded the launch of an Urban Cycling Research Institute, which received two grants in 2015 (two more pending): **NWO SURF** (project title ‘Smart Cycling Futures’), and a grant from the **ASDI eScience Center** (project title ‘Cycling to Zero’);
- The Centre was instrumental in the **successful grant application CODALoop**, led by prof. Luca Bertolini (Call: JPI’s Urban Europe, ERA-NET Cofund Smart Cities and Communities);
- CUS postdoc **Willem Boterman was awarded a NWO VENI** grant for a proposal on ‘Placing educational inequalities: Socio-spatial strategies for access to primary education’;
- The Centre is directly involved in the **R-LINK research project (awarded with an NWO SURF grant)** together with RUG and the Hanze Hogeschool via CUS member prof. dr. Jan Willem Duyvendak;
- Together with the Indian Institute of Technology (IIT), the Centre **organized a joint conference on ‘Sustainable Urban Development’ in Mumbai**, inaugurated by the Mayor of Amsterdam, Eberhard van der Laan (as part of his India Mission), thus establishing a direct link with one of the world’s emerging focal areas of urban challenges and research;
- CUS was instrumental in setting up a **new exchange programme for research master students in Urban Studies between the University of Amsterdam and the Indian Institute of Technology Mumbai**, further strengthened the strategic link with the Indian context and allowing a broadening of the ResMa to include a ‘Global South’ perspective;
- CUS’ electronically published **Working Paper Series (WPS)**, which allows for timely dissemination of research findings, **reached over 5,000 unique international visitors** and was included in Google Scholar;
- We welcomed **10 new CUS members**, strengthening ties with the departments of Sociology (among others, prof. dr. Beate Volker, dr. Dorien Zandbergen, dr. Bowen Paulle, dr. Linda van de Kamp), Anthropology (among others, dr. Eileen Moyer, dr. Oskar Verkaaik, dr. Annemarie Samuels) and Political Science (prof. dr. John Grin);
- Eric Chu was appointed as **new, cross-cutting Urban Studies post doc**, set to strengthen the links and realize the opportunities at the interface of urban planning and international development studies, by focusing on the topical issues of urban infrastructure governance in the face of climate adaptation challenges
- In 2015, the Centre **welcomed 7 international visitors**, who collaborated on projects with various staff and who gave colloquia in the CUS lecture series;
- The Centre **launched a very successful ‘Urban Studies Seed Grant’** open call for its members, to support and facilitate innovative, interdisciplinary research initiatives of CUS’

members and plant ‘promising seeds’ to stimulate original research in the field of Urban Studies;

- The Centre **launched a Ph.D travel grant** to assist CUS’ Ph.D. candidates in their dissertation work, so they can gain valuable international experience and set up promising collaborations with (potential) partners abroad.
- The Centre **increased its visibility** and strengthened ties with the City of Amsterdam, among others through various successful initiatives with Pakhuis de Zwijger (‘Urban Movie Night’, ‘City as a Lab’ public debates), and played a leading role in setting up a knowledge platform on urban mobility with other knowledge institutions and the municipality;
- The Centre maintained close ties with the **Amsterdam Institute for Advanced Metropolitan Solutions** (AMS) in a lecture series ‘Let’s Talk Solutions’ (prof. dr. Peter Sloot, dr. Michael Shin), and summer school (‘Thinking City Beyond Resilience’)
- The Centre, together with researchers from the faculty research priority area Amsterdam Centre for Inequality Studies (AMCIS), made a **bid for additional funding** of €300.000 per year to the University of Amsterdam. The bid was ranked second (and thus eligible for financing) by the university research committee UOC (Universitaire OnderzoeksCommissie), but the University Board decided in the end not to finance it because of an alleged insufficiently exclusive focus on the research priority area. The board, however, also recognized that the interdisciplinary, cross-cutting approach of the proposal highlights new opportunities that will be considered when redesigning the research policy of the University.

## 2.2 Added value of research priority area Urban Studies

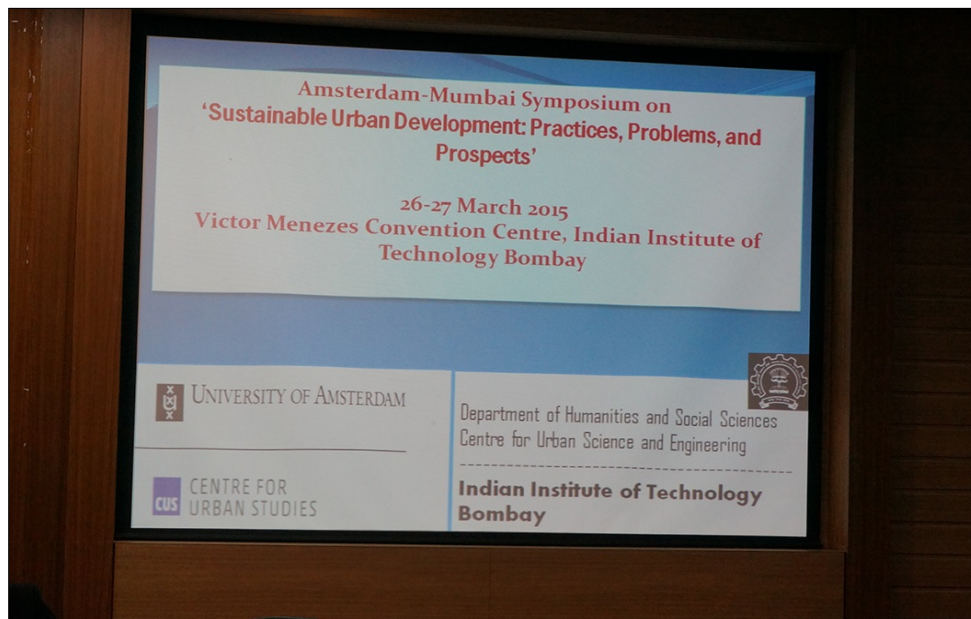

In 2015, the Centre for Urban Studies profited strongly from past and ongoing efforts to foster an interdisciplinary dialogue, and to stimulate original research in the field of Urban Studies. Several of CUS’ initiatives were central to the strong performance of 2015:

At the start of the year, the Centre for Urban Studies funded the creation of the Urban Cycling Initiative (UCI), an interdisciplinary research platform with a clear scientific and policy-oriented agenda, headed by CUS members Dr. Marco te Brommelstroet and Dr. Willem Boterman. The Urban Cycling Initiative proved instrumental in fostering the advancement in urban sustainability, and its added value was recognized widely. Throughout the year we reaped the benefits as UCI was awarded with two externally funded projects (NWO SURF, ASDI eScience Center), got media coverage in the Netherlands and abroad (Radio 1, BNR, The Guardian, Parool, Volkskrant, NRC, Economic Times of India), launched a new summer school (‘Planning the Cycling City’ fully booked), and was productive in terms of academic and professional output.

Through our joint conference in Mumbai with the Indian Institute of Technology (IIT-B), we have intensified our geographical ties in the Global South, and strengthened linkages with development studies. The strong presence of CUS (prof. dr. Isa Baud, prof. dr. Joyeeta Gupta, prof. dr. Jan

Nijman, prof. dr. Peter Sloot, dr. Willem Boterman, et cetera) was pivotal in building our institutional network with a host of academic partners (HvA, VU, IIT, Centre for Policy Research Delhi, Tata Institute of Social Sciences), with the City of Amsterdam (Mayor's Office, Planning Department, Economic Board, Waternet) and with a wide variety of non-governmental organizations. The high-profile conference brought together scholars and researchers, urban planners and urban development government functionaries, and activists and practitioners from Amsterdam and Mumbai to brainstorm and share lessons learnt on problems of urbanization, development and sustainability.

From left to right: Prof. R. Dusane (Dean of International Relations, IIT), Mr. S.C. Deshpande (Project Director MMRDA, Mumbai Metropolitan Region Development Authority), Eberhard van der Laan (Mayor of Amsterdam), Prof. J. Nijman (UvA/CUS).

In 2015, the Centre recruited 1 assistant professor with highly regarded and competitive credentials (Eric Chu). The recruitment is on the cutting-edge theme ‘*adaptive cities in relation to global climate change*’, at the interface of two programme groups: Urban Planning and Governance and Inclusive Development. This strategic position in Urban Studies is supervised by two of CUS’ full professors (Joyeeta Gupta and Luca Bertolini). The appointment is for two years with the expectation of significant external acquisition and the possibility of a steady appointment if successful. This has proven a successful formula as we were able to recruit top talent; Willem Boterman’s recent NWO VENI grants attests to that (in the past years, Rivke Jaffe, ERC Starting Grant, NWO VIDI, NWO ORA, Richard Ronald, ERC Starting Grant).

### 2.3 New director

At the start of the new academic year (2015-2016), Jan Nijman stepped down as director of the Centre and was succeeded by Luca Bertolini. This shift in directorship naturally resulted in modifications in the strategic direction of the research priority area. Building on the exceptional track record of the Centre, we now fine-tune our efforts on three key fronts (see also section 5 ‘Future’):

1. The first and foremost is further realizing the distinctive synergetic potential *within* the Centre. There is a truly amazing mass and variety of brilliant and skilled researchers at the Centre for Urban Studies, and there still seems much to be gained by engaging more with each other: exchanging ideas and developing new ones in the process. This is thought to directly impact the quality of the research that is done at the Centre. The successful *Urban Studies Seed Grants* are a good example of how we now aim to support and facilitate research initiatives of CUS’ research staff, and increase CUS’ synergetic potential. The grants are provided to assist our members in their work, to foster an interdisciplinary dialogue, and to plant promising ‘seeds’ in order to stimulate original research in the field of Urban Studies. Another example of increasing the synergetic potential within the Centre is the Urban Studies Networking Day, to be organized in September 2016.
2. Second is the potential of *Amsterdam as an urban research and policy laboratory*. Of course, we are all already doing research in the city, and there are all sorts of policy experiments going on. But these are often fragmented, isolated experiences. What if there was more connection (or confrontation)? What if the different knowledge institutions (HvA, VU, AMS), the municipality (B&W, Amsterdam Economic Board, Ruimte & Economie), and actors in civic society (activists, citizens, stakeholders) would take up the challenge together, more so than they are doing now? The new ‘*City as a Lab*’ series enables these connections and confrontations. The ‘*City as a Lab*’ events are public debates, organized in Pakhuis de Zwijger, in which timely topics are discussed from different perspectives (social scientific, engineering/technology, stakeholder/policy perspective). The platform brings a wide variety

of people from different backgrounds and disciplines together, and is suitable to reflect on the question whether the city can be used as a laboratory for research and practice. Future research questions and promising research agendas are identified. Another example is the leading role of the Centre in the *knowledge platform on urban mobility*, initiated together with other knowledge institutions in the city (AMS, VU, HvA) and the municipality. Goal of the platform is exchange information on research needs and opportunities and realize synergy in joint projects. Members of the platform have been extraordinarily successful in the recent NWO-SURF call, and have recently been awarded a grant by the city to set up a major evaluation study of the mobility, economic, and spatial impacts of the new North-South metro line. Talks about the sharing and integration of data-bases are also under way. It is a pioneering, but already successful experience, which could become a model for collaboration in other urban policy and research domains.

3. Third is the *international front*. Researchers at the Centre all have contacts and often long-standing collaborations with colleagues abroad, and the Centre has already taken a couple of overarching initiatives in this regard (e.g. in 2015 the Amsterdam-Mumbai conference). What seems promising here is not so much the multiplication of formal agreements, but rather bringing international partners together around common, concrete purposes: a staff exchange, a seminar, a PhD workshop, a joint research project or proposal. On the 21<sup>st</sup> and 22<sup>nd</sup> of April, 2016, we are planning joint workshops with the University of Sheffield, where they have a similar Centre for Urban Studies. The research agendas of both Centre's complement each other to a large extent, and the expertise of our researchers aligns with the expertise of Sheffield's. Aim is to identify research proposals and upcoming calls (H2020, JPI's, NORFACE, COST, ORA) that have potential, and organize the workshops in such a way as to enable people who want to work together to start writing the first contours of a fuller research proposal. The possibility of a similar initiative with Manchester University is being explored. Furthermore, we have changed the format of the visit of colleagues from abroad. Rather than a one-off lecture, these now include a public lecture outside of the university (to increase visibility) and more interactive and developmental activities at the university (such as a PhD workshop, or a seminar to explore prospects of joint research projects).

The year 2015 saw another important initiative that helped sustain innovation in the future: the Executive Board, consisting of representative of CUS' affiliated research groups (c.q. the Centre's full professors), approved the installment of an Advisory Board. The Urban Studies Advisory Board comprises 'rising stars' of the Centre (young, successful researchers, often just, or set to soon become full professors), meets several times a year, and has been given room by the Executive Board to develop innovative ideas for how to foster internal synergy and public and academic outreach of the Centre.

The composition of both boards:

## 2.4 Challenges

There are four main challenges

The first challenge relates to uncertainty about continuing financing of the Centre after 2016. The University policy on research priority areas is presently being revised and there is as yet no clarity about what the practical implications for the Centre will be. We have a strong and growing membership and track record and are thus well positioned to continue securing funding, but persistent uncertainty about procedures and conditions means we cannot make any long term commitment, as for instance the appointment of new post docs. While waiting for clarity, opportunities and talent might be lost.

The second challenge is that much of our recent efforts have been going into planting the seeds for new initiatives (see section 2.3 above), which need, by definition, time to bear fruit. At this delicate moment of securing long term funding we cannot therefore show all the results. Furthermore, much of the new initiatives are directing and enabling a certain shift in culture and orientation of our members, from only focusing on the own programme group and discipline to also realizing programme group-cutting synergies and interdisciplinary opportunities with the university, with the city, and internationally. It is a process already under way, one that especially younger members enthusiastically embrace, but it requires continuous care and prompt learning from both successes and failures.

The third main challenge is brought about by the incessantly changing landscape of local, national, European, and global research agendas. In introducing section 2 the great and increasing centrality of urban issues in research funding programmes at all levels has been underscored as a key opportunity and *raison d'être* for the Centre. The challenge is to keep track, and better to anticipate on shifting conditions of success, pass the insights on to members, and facilitate the formation of strong networks of researchers and stakeholders around innovative scientific ideas and urgent societal issues that are increasingly in demand.

Finally, there is an operational challenge deriving from upcoming changes in all support staff of the Centre. By mid-2016 or shortly thereafter, one support staff will leave, another will end his contract, and the third is re-orientating towards different parts of the Faculty organization. There is an urgent need to timely secure a stable support base to carry out the many initiatives presently being set up, as well as being able to keep starting new ones.

## 4. Other Results

Our ongoing efforts in 2015 resulted in a wide variety of collaborations, output, events, etc. Some of these are outlined below.

- The Centre for Urban Studies continued to reap the benefits of our partnership with **Pakhuis de Zwijger**, which significantly increased CUS' visibility in the city (most notably through our Urban Movie Night, Lecture Series, and at the start of 2016 in the 'City as a Lab' public debates);
- **Ten Ph.D. students graduated in 2015;**
- CUS' **highly maintained website reached over 57.000 page views in 2015**, with visitors coming from all over the world (most notably the US, UK, China, India, Australia, France, Germany), which highlights the international character of the Centre;
- The Centre **facilitated and co-funded the publication of the book 'EU@Amsterdam. Een Stedelijke Raad'** (Amsterdam University Press), in the run-up to the 2016 Dutch Presidency of the Council of the European Union;
- Together with academic partners, **the Centre co-organized several round-table events under the flag of EU@Amsterdam;**
- The Centre's **Working Paper Series (WPS) reached over 5,000 unique visitors** and contributed to the wide dissemination of research output and expertise in the field of urban studies;
- **The Centre for Urban Studies was invited**, as the only academic entity along with various high profile private consulting firms, **to provide an essay for the Ministry of the Interior on the topic of social challenges to Dutch local governments.** The essay bundle titled '*Goed openbaar bestuur in stad & stedelijke regio*' was published via the Dutch central government and presented in March 2015 at the Ministry of the Interior;
- The Ministry of the Interior **invited CUS researchers to evaluate the 'Rotterdamwet'**, leading to the report '*Evaluatie effecten Wet bijzondere maatregelen grootstedelijke problematiek ('Rotterdamwet') in Rotterdam*';
- In 2015, we increased the visibility of urban studies through the promotion of research projects and related events not only among our research staff but also in **CUS newsletters, media, on posters, and on the web.**
- The Centre **planted five 'promising seeds' in 2015**, through the Urban Studies Seed Grant open call scheme. These are: (1) a high-profile 3-days international seminar on 'Institutions in Action' initiated by CUS member prof. Willem Salet; (2) A special issue on 'Homing the Dutch: On the Planning and Politics of Belonging' and, connected to that topic, an international seminar, initiated by CUS member prof. Jan Willem Duyvendak; (3) A research internship to track down and map sustainability projects in Amsterdam on an international web-based platform to come to pressing research questions and agendas, initiated by CUS

members Joos Drooglever-Fortuijn and Hebe Verrest; (4) A high-profile workshops that reflects on the outcomes of three research projects on ‘Power, Citizenship and Participation in ‘smart’ urban environments’ initiated by CUS member Dorien Zandbergen and GiD programme group; (5) A seminar ‘Opgroeien in de drukke stad’, valorisationproject by CUS member Lia Karsten, launch of a book on that same topic. Results and output of these projects are expected in 2016. The seeds are planted to set up new collaborations, to explore new research agendas, come to pressing research questions.

## 4.1 Collaborations

The Centre for Urban Studies maintains close ties with the public sector and (inter)national partners. Furthermore, we facilitate between the different programme groups that are represented in the Centre and external partners. The programme groups represented in CUS are: (1) Challenges to democratic representation; (2) Computational Science; (3) Geographies of Globalizations (GoG); (4) Governance and Inclusive Development (GID); (5) Political Sociology: Power, Place and Difference; (6) Transnational Configurations, Conflict and Governance; (7) Urban Geographies (UG); (8) Urban Planning (UP). Below is an overview of these ongoing and newly initiated collaborations.

**Most notable new (inter)national collaborations/consortiums in 2015 were through the newly acquired research projects. Amongst others, R-LINK (Wageningen University, Rijksuniversiteit Groningen, Hanze Hogeschool, HvA), CODALoop (TU Delft, Yildiz Technical University, Graz University of Technology, Amsterdam Economic Board/Amsterdam Smart City, PBL), NWO VENI (University of Bristol, King’s College London, University of Oxford), Smart Cycling Futures (Universiteit Utrecht, TU Eindhoven, Windesheim), Cycling to Zero (TOI Noorwegen), etc.**

### 4.1.1 Ongoing collaborations with the Public Sector

Inter alia, but most notably:

- Academie van de Stad (educational partner in the research master’s programme in Urban Studies);
- Amsterdam Academische Club;
- Amsterdam Economic Board/Amsterdam Smart City;
- Centraal Bureau voor de Statistiek (CBS), The Hague, amongst other projects, a meta-data analysis on cycling and cycling behavior;
- Dienst Onderzoek en Statistiek (O+S), Municipality of Amsterdam (various research collaborations);
- Dutch Cycling Embassy (collaborator in the Urban Cycling Institute, an initiative launched by the Centre for Urban Studies);

- Fietsersbond, collaboration to evaluate the effectiveness of cycling policy;
- Geestelijke Gezondheids Dienst (GGD) Amsterdam (research project examines the effects of risk communication on risk perception);
- Pakhuis de Zwijger (aimed at a broad audience, the Centre for Urban Studies organizes multiple ‘Urban Movies’ nights and ‘City as a Lab’ debates throughout the year with Pakhuis de Zwijger);
- Municipality of Amsterdam (various departments and research collaborations);
- Planbureau voor de Leefomgeving (PBL);
- United Nations (the Centre for Urban Studies is appointed ‘Innovating Research Centre’ in the UN’s Cities Programme, the world’s largest corporate responsibility initiative which strives to create sustainable societies in which economic, ecological, political and cultural issues are integrated and advanced).

#### 4.1.2 (Inter)national Academic Partners

Inter alia, but most notably:

- Amsterdam Institute for Advanced Metropolitan Solutions (AMS);
- Centre for Policy Research (CPR), New Delhi, India, research collaboration on drinking water and sanitation in India;
- Exchange partners / educational academic partners for the research master students in Urban Studies: Humboldt Universität, University of Birmingham, University of Bonn, Boston Northeastern University, Slovak University of Technology in Bratislava, Vrije Universiteit Brussel, Aalto University, University of Glasgow, Izmir Institute for Technology Turkey, Hong Kong University, City University Hong Kong, UCL, Bartlett School of Planning, Universidad Politecnica de Madrid, University of Melbourne, Dipartimento Architettura e Pianificazione, Politecnico di Milano, Newcastle University, Fordham University, Institut Français d’Urbanisme Paris, University of Pretoria, University of Washington, Royal Institute of Technology (KTH) Stockholm, Florida State University, UBC School of Community and Regional Planning Vancouver, Bauhaus Universität Weimar, Indian Institute of Technology Mumbai (IIT-B);
- Free University (VU Amsterdam);
- Hanze Hogeschool, R-LINK: Redressing Long-term societal challenges through space for Incremental urban development, small-scale and bottom-up initiatives to produce New Knowledge for vital and inclusive urban regions;
- Hogeschool van Amsterdam, R-LINK research project;
- King’s College London, NWO VENI project Willem Boterman, ‘Placing educational inequalities: Socio-spatial strategies for access to primary education’;
- Graz University of Technology, research project Community Data-Loops for energy-efficient urban lifestyles (CODALoop);

- Norwegian Institute for Urban and Regional Research;
- Uppsala University, research collaboration on neighbourhood effects led by the Urban Geographies (UG) research group;
- Wayne State University, research collaboration on neighbourhood effects led by the Urban Geographies (UG) research group;
- York University, Canada, collaboration on Global Suburbanism;
- Indian Institute of Technology Bombay (IIT Mumbai), ongoing collaborations on Sustainable Urban Development and Urbanization in India;
- Wageningen UR, Wageningen, R-LINK research project;
- EU-ACP project with UWI (Trinidad); dissemination science and technology for urban management ;
- University of British Columbia, research project on markets and diversity, a research question that centers on the impacts of cultural diversity on the nature and operation of street markets;
- University of Bristol, NWO VENI project Willem Boterman, 'Placing educational inequalities: Socio-spatial strategies for access to primary education';
- University of Miami, USA, research collaboration on planning law and housing;
- University of Ulster, Belfast, on Land Economics, Planning System Reform and Consensus-building;
- University of Utrecht, research collaboration titled 'Smart Cycling Futures';
- University of Oxford, research project on 'Placing educational inequalities: Socio-spatial strategies for access to primary education';
- Universidade de São Paulo, research project 'BESEFOGO: "Between self-regulation and formal government: the challenges of self-build housing and facilities' under the FAPESP-ESRC-NWO Call on Sustainable Urban Development.
- Rijksuniversiteit Groningen, R-LINK research project / consortium;
- TU Delft, research project Community Data-Loops for energy-efficient urban lifestyles (CODALoop);
- University of the West of England, research project PARCOUR 'Public accountability to residents in contractual urban redevelopment' under the FAPESP-ESRC-NWO Call on Sustainable Urban Development;
- Hanze Hogeschool, R-LINK research project / consortium;
- TOI Noorwegen, research project 'Cycling to Zero'.
- Yildiz Technical University, research project Community Data-Loops for energy-efficient urban lifestyles (CODALoop);
- TU Eindhoven, research project on Smart Cycling Futures by the Urban Cycling Institute;
- Windesheim, Smart Cycling Futures;

### 4.1.3 Ongoing External Research Collaborations

Selected, ongoing collaborations in research groups represented within the Centre for Urban Studies:

#### Urban Planning

- Project: Accessibility Instruments For Planning Practice In Europe.

- Project: Transforming Cultural Heritage: The New Dutch Water Defense Line.  
Partners: Ministry of Education + Ministry Economic Affairs (Project Office New Dutch Water Defense Line).  
Coordinator: prof. dr. W.G.M. Salet and Dr. J. de Vries (UvA/ Centre for Urban Studies)  
PhD study Koen Raats

- Project: Emergent Practices of strategic spatial planning  
Sponsored by Ministry of Infrastructure & the Environment.  
Researcher: dr. Rick Vermeulen  
Supervisor: prof. Willem Salet
- Project: Smart City  
Adaptation and Acceptance of new technologies with a focus on the potential of smart buildings.  
External PhD research.  
Researcher: Kees Jansen  
Supervisor: Prof. Willem Salet (UvA/ Centre for Urban Studies)
- Project: Justice in Urban Policies  
Sponsored by Scientific Organization Taiwan.  
Researcher: Ching Wen Yang  
Supervisors: Prof Willem Salet and Dr Jochem de Vries (UvA/ Centre for Urban Studies)
- Project: New Town Development around HSR stations in China  
Sponsored by Chinese Scientific Fund  
Researcher: Guowen Dai  
Supervisors: Prof. Willem Salet and Dr. Jochem de Vries (UvA/ Centre for Urban Studies)
- Project: Social and spatial transformation of the Dutch Polders  
External promotion research.  
Researcher: Miranda Reitsma  
Supervisors: Prof Arnold Reijndorp and Prof. Willem Salet (UvA/ Centre for Urban Studies)
- Project: Reinvest: Financing Affordable Housing Under Localism  
Partners: University of Manchester, University of New York, University of Amsterdam  
Researcher: Dr. Anita Blessing  
Supervisors: Prof. Willem Salet (UvA/ Centre for Urban Studies)
- Project: Provenance, strategic planning and contractualism  
External promotion research.  
Researcher: Prof. Greg Lloyd  
Supervisors: Prof. Willem Salet and Dr Leonie Janssen-Jansen (UvA/ Centre for Urban Studies)
- Project: Climate adaptations and the waterboards  
Researcher: drs Niels Al (external PhD research)

Supervisors: Prof. Guus Borger, Prof. Willem Salet (UvA/ Centre for Urban Studies) and Prof. Johan Woltjer (Univ Westminster)

### **Geographies of Globalization**

- Project: *Understanding the current wave in globalization: The segmented outcomes of offshore service development in Mumbai and Manila.*

- Visit and guest lecture by prof. Roger Waldinger (Distinguished Professor of Sociology, UCLA), in cooperation with Pakhuis de Zwijger, March 2016.
- Visit and guest lecture by prof. Roger Andersson (Uppsala U), in cooperation with Pakhuis de Zwijger, April 2016.
- Stad als Lab#2 Public Debate at Pakhuis de Zwijger *'Smart City'*, Moderator CUS member Dorien Zandbergen, March 24, 2016.

- Stad als Lab#3 Public Debate at Pakhuis de Zwijger '*Urban Conflicts*', Moderator CUS members Floris Vermeulen / David Laws, April, 2016.
- Stad als Lab#4 Public Debate at Pakhuis de Zwijger '*Urban Security*', Moderator CUS member Rivke Jaffe, May, 2016.
- Stad als Lab#5 Public Debate at Pakhuis de Zwijger '*Urban Diversity*', Moderator CUS member Tuna Tasan-Kok, June, 2016.
- Visit and guest lecture by Dr. Jonathan Metzger (Associate Professor at KTH Royal Institute of Technology), May 2016.
- Visit and guest lecture by prof. Kevin Ward (Professor of Human Geography at University of Manchester), May 2016.
- Various Ph.D. workshops with the five visiting lecturers (Waldinger, Andersson, Ward, Metzger, Zipp). March-June 2016.
- 'Paleis voor Volksvlijt 2016', April 12 – July 4, 2016. The Centre for Urban Studies will contribute with a public seminar on the '*Future of the City*', a series of public seminars '*Digging the City*' (*Stadgraven*) in which PhD's of CUS will present their research on the city, and the Urban Studies Research Master students will organize a special seminar on the future of the city – hosted by the Openbare Bibliotheek Amsterdam (OBA).
- 13 Seed Grant events, organized with the Urban Studies Seed Grant funding scheme, in 2016-2017. Seminars, workshops, conferences, debates, round-tables.
- CUS Conference – '*Housing Wealth and Welfare*', May 25-26, 2016. This conference aims to bring together the latest theories and empirical findings in the dynamic research field surrounding housing wealth and welfare.
- Urban Studies Summer School '*Planning and Living in Cities*', July 3-22 2016.
- Summer School '*Planning the Cycling City*' – in cooperation with the Urban Cycling Institute, June 19 – July 8, 2016.

## 5. Future

The future direction of the Centre hinges on the three fronts introduced in section 2.3 above: realizing the synergetic potential (1) within the Centre, (2) between the Centre and the city, and (3) between the Centre and other analogous institutes abroad. Below we zero in on the most important strategies/initiatives / activities relating to these three fronts (including grant strategy, personel, strategic course). For a complete overview of planned events see section 4.3.5 ‘On the Horizon: 2015 calendar’.

In order to realize and increase synergetic potential within the Centre, key initiatives in 2016 will be:

- A new postdoc on the strategic theme ‘Resisting Urban Marginality. Urban social movements’, on the interface of two programme groups: ‘Political Sociology: Power, Place and Difference’ and ‘Challenges to Democratic Representation’; as soon as continuation of research priority area funding is clear, a call for one or two new cross-cutting post doc positions will be launched;
- Cross-over seminars between different program groups, to explore the scope for exchange and collaboration. Already planned are one between urban planners and political scientists (programme groups ‘Urban Planning’ and ‘Political Sociology: Power, Place and Difference’) and between political scientists and sociologists (programme groups ‘Political Sociology: Power, Place and Difference’ and ‘Transnational Configurations, Conflict and Governance’).

In order to realize synergy potential with the city, key initiatives in 2016 will be:

- ‘City as a Lab’ events to identify pressing societal issues, research questions and interdisciplinary research agendas. Already planned are events on (1) ‘Smart City Governance’; (2) ‘Urban Conflicts’; (3) ‘Urban Security’; (4) ‘Urban Diversity’.
- Participation in Volksvlijt 2016, a public, multiple-week programme of debates and events around the future of Amsterdam coinciding with the start of the Dutch EU presidency; the Centre will organize (1) five sessions where CUS’ Ph.D.’s present and discuss their work and progress; (2) The research master seminar for the second year research master students in Urban Studies; (3) Roundtable debates on the recently launched book *EU@Amsterdam. Een stedelijke raad* (CUS member Virginie Mamadouh);
- Other high visibility events that increase synergetic potential in and with the city of Amsterdam: (1) public lectures in Pakhuis de Zwijger with high profile CUS guests, i.e. visiting professors / lecturers; (2) several book launches (*‘Opgroeien in de drukke stad’, ‘Conflict, Improvisation, and Governance’*); (3) CUS sponsored seed grant initiatives from CUS’ members (conference on ‘Urban Professionals’, seminar on ‘Urban Tourism’, workshop on ‘Smart Urban Environments’, seminar on ‘Urban Public Space’, public events ‘Amsterdam Fair City’, seminar on ‘Home and Belonging’).
- Active participation in the knowledge platform for urban mobility (e.g. set up of, and possible participation in a before-after study of the new North-South metro line, joint

NWO-STW project proposal) and possible initiation of similar platforms around other topical issues.

In order to realize synergy potential with analogous institutes abroad, key initiatives in 2016 will be:

- Sheffield joint workshops with Sheffield's Urban Institute (writing research proposals for different calls H202, JPI Urban Europe, NWO's Open Research Area ); collaborations along similar lines with the University of Manchester will be explored during a visit of University of Manchester center for urban study director Kevin Ward in June;
- Seed grant OURSUS/China conference in Beijing on sustainable cities, initiated by CUS members Joos Droogleever-Fortuijn and Hebe Verrest;
- Already planned visits of colleagues from abroad, all including a public lecture outside of the university and more interactive and developmental activities at the university. Prof. Kevin Ward from U of Manchester, Prof. Roger Waldinger from UCLA, Prof. Roger Andersson from Uppsala U, associate professor Samuel Zipp from Brown University, associate professor Jonathan Metzger from KTH Royal Institute of Technology Stockholm.
- PhD travel grants

In addition:

- The Centre is co-organizer and host of the 'Housing Wealth and Welfare' conference (25<sup>th</sup> and 26<sup>th</sup> of May 2016). The conference brings together the latest theories and empirical findings in the dynamic research field surrounding housing wealth and welfare, taking into account the different meanings of 'welfare' – from welfare provision to well-being as well as situations indicating a 'lack of welfare', such as poverty and inequality. Organized by CUS member prof. dr. Richard Ronald;
- We work together with UvA's Centre for Sustainable Development Studies (CSDS) in the organization of a conference on the Sustainable Development Goals (lead by CUS member prof. Joyeeta Gupta). The Centre for Urban Studies will organize a session on sustainable cities;
- In December 2016, CUS member prof. Willem Salet organizes a conference on 'Institutions in Action', made possible with CUS' Seed Grant initiative. The conference increases the position of Urban Studies in the international debates and endorse reflection in urban practices;
- Major external grant applications are pending with NWO, ERC, and H2020; additional applications with the ERC are in preparation to be submitted in June of 2016, and H2020 in January 2017
- Centre director Luca Bertolini is directly involved in the process that will lead to the investment agenda in the exemplary route 'Smart, liveable cities' of the Dutch national research agenda; furthermore he is engaged in discussions with the Ministry of Infrastructure and the Environment and knowledge platform Platform 31 on the contours of urban policy

and research laboratories ('living labs') to address urban challenges in cities in the Netherlands

- In another promising seed grant initiative by CUS member prof. Jan Willem Duyvendak, a special issue is published and a seminar organized on 'Homing the Dutch: On the Planning and Politics of Belonging'. Insights gained from this study are of direct concern for the Centre for Urban Studies since it focusses on discrepancies between urban planning and daily life experiences of urban dwellers, the relation between the built environment and experiences and meanings of home in heterogeneous urban settings.
- Dorien Zandbergen's seed grant brings together scholars on 'Smart City developments' during a workshop. This workshop will present and discuss insights from three research projects: (1) the KIP project within the GID group on power and emerging norms in data governance within Smart City Amsterdam; (2) the NWO project on equal stakeholdership in the Smart City co-situated in the Sociology department; and (3) the Cultural Conflict 2.0 research group, also in the Sociology department which studies digital media in the context of local community dynamics. Aim is to come to new research agendas and develop new research proposal;
- 10 new seed grant applications have been submitted and are being considered
